## Assignment #7

### Practicing OOP:

This assignment is for working on OOP concepts, there are 7 projects which are listed below: *(these are console application, means there is no need for UI)*

1. Contact List program
2. Note App program
3. ToDo List program
4. Address Book
5. Library Management System
6. Student Management System
7. Hotel Management System

You should create at least 3 of them, you can choose whatever you are interested in.

In order to be familiar with the idea of creating these projects here is a description for **Contact List** application. It is a program which we can use to **store** contacts, **display** the stored contacts, **edit** and **deleted** them, etc.

In order to create this program you should use **classes**, **objects**, **list**, **methods**, **control flow** statements, **loops**, etc.
